PROFESSIONAL SUMMARY

A computer science graduate from the University of Venda with hands-on experience developing full-stack web applications through academic and personal projects. Skilled in front-end and back-end development, database integration, and translating client needs into functional digital solutions. A strong problem solver with a passion for building real-world software and a solid grounding in databases and statistics. Currently pursuing Honours in Computer Science, demonstrating commitment to continuous learning and technical growth.

EDUCATION

BSc Honours in Computer Science | University of Limpopo, Polokwane *2026 – Present*

- Research focus: The development of an isiNdebele text classification model, involving dataset collection, preprocessing, and data analysis
- Modules: Computer Networks, Advanced Database, Operating Systems, Advanced Software Engineering

Bachelor of Science in Computer Science | University of Venda, Thohoyandou *2023 – 2025*

- Completed undergraduate degree with a focus on software development, databases, and systems
- Key modules: Data Structures, Algorithms, OOP, Database Management Systems, Big Data & Business Intelligence, Statistics, Web Development

PROJECTS

Portfolio Website (Personal Website) | Live Demo | GitHub Repository

- Designed and built a responsive single-page portfolio website showcasing my skills, projects, education, and downloadable CV
- Developed a hero section with call-to-action buttons, an about section, a technology stack grid, and a project showcase featuring web and software projects
- Integrated a contact form using Formspree, along with social links, WhatsApp, email, and CV download options
- Implemented mobile-friendly responsive design with smooth scrolling and animations
- Deployed the site with GitHub Pages and documented the project with a README covering structure and local setup
- Technologies: HTML5, CSS3, JavaScript, Git, GitHub

AAA POPA PRIZE (Promotional Website) | popd.co.za

- Designed and developed a full promotional website for a live entertainment luck game brand
- Built interactive features including a live countdown timer, prize showcase, winners section, and SMS entry instructions
- Implemented animated UI elements, hover effects, and mobile-first responsive design for cross-device compatibility
- Documented the project with a full System Requirements Specification (SRS) covering functional and non-functional requirements
- Technologies: HTML, CSS, JavaScript, Git, GitHub

Product Inventory Manager (Java App) | GitHub Repository

- Designed and built a command-line inventory management application in Java for a fictional tech retailer, using object-oriented principles to separate business logic from data models
- Implemented full CRUD functionality (create, search, update, delete) for product records using ArrayList-based data structures
- Built input validation and menu-driven navigation to guide users through category selection, warranty terms, and stock management
- Developed a reporting module that aggregates inventory data to calculate total stock value and average product price
- Structured the codebase into separate classes (Products, ReportData) to demonstrate encapsulation and separation of concerns
- Technologies: Java, OOP, Git, GitHub

TECHNICAL SKILLS

Programming:	Python, Java
Web:	HTML, CSS, JavaScript, PHP
Databases:	MySQL, MongoDB
Core:	Data Structures, Algorithms, OOP, REST APIs, Debugging
Tools:	Git, GitHub, VS Code
Soft Skills:	Problem-Solving, Adaptability, Communication, Team Collaboration, Self-Management

CERTIFICATIONS

- Codsoft Java Developer Certificate (Online Course) — 2024

LANGUAGES

- English — Fluent
- Tshivenda — Fluent (Home Language)
